

MOBILE I

Found Rocks, Brass, Glass
 120(h) x 120 (d) cm
 23 kg

Mobile 1 is a contradiction that combines regularity with randomness. Straight lines of solid brass hold in place delicate sheets of tinted glass counter-balanced against weights of granite. The irregular-shaped rocks find their equilibrium against sheets of glass cut to correspond with ISO paper sizes (A4 and all its siblings), a formula based on a single-aspect ratio of the square root of two.
