

SILO

Sycamore, Brass
90 (w) x 50 (d) x 175(h) cm
100 kg

In agriculture, a silo is a structure for storing grain. This 'Silo' – a modern cabinet – is designed to store personal collections and curiosities. Hand-made from solid English sycamore, the cabinet mimics the silhouette of the eponymous corrugated-metal construction and has slatted tambour doors. The solid-sycamore doors roll back to reveal thin shelves secured in place using cylindrical brass pegs.
