

SPADE CHAIR

Sycamore, Brass
86(h) x 45(d) x 41(w) cm
4 kg

The spade is an icon of rural life in the English countryside. The Spade Chair is a modern tool for sitting. Made by hand using English sycamore, the chair has an elegant and minimal silhouette inspired by the juxtaposition of a three-legged milking stool and the handle of a gardening implement.

With structural honesty at the heart of the design, all of the metalwork used to support the thin seat is on full view and detailed in brass. The chair is available in its 'naked' form or with a roll for further support and comfort.
